

## Missing submission notification and missing members checklist for employers on-boarded to MCR

Recently we've made some changes to our systems which has resulted in employers not receiving missing submission notifications or missing members checklist files.

Usually, the missing notification is sent out if we haven't received the relevant MCR file by the expected date of the 15th of the month. This has been resumed and going forward employers will continue to receive notifications.

## MPO report and email templates

As you may be aware, every month we send a report to establishments outlining members who are yet to sign up to My Pension Online (MPO). We encourage the use of the portal as it's a great tool members can use.

To make it easier for employers to put forward this message to members, we've created a number of email templates that can be sent to employees, encouraging them to register.

## FURTHER NEWS

### Multi Factor Authentication (MFA)

On 10 May we launched MFA for both members and employers. **We explained** the reasons behind this change and the benefits, which include enhanced security, better user experience, and extended Employer Portal usage time.

We've advised employers that if any of their employees would like to understand more about MFA, we've a selection of **member FAQs** that they can signpost them to. Additionally we've got some **employer FAQs** with which you may wish to familiarise yourselves if you've got access to the establishment's Employer Portal.

### Transitional Protection progress - legislation and timescales

Stage one legislation required for the Transitional Protection remedy has been completed.

We can't implement the remedy for stage two until the legislation is in place, so we'll not be able to provide options to those affected until October 2023 at the earliest.

We'd like to remind employers to encourage any affected staff to retire as normal as we'll apply any changes retrospectively.

We've discovered that some establishments are submitting contributions and signing

associated declarations that aren't matching the associated submissions. Unfortunately, this is causing unnecessary work for establishments to correct.
